

Kelly,

The Tiger Arena project is quite high. I can't track down the estimates for the other trades but we had estimated the MEP portion to be around \$890,000 with the full conversion of the existing building controls. I can't speak for Whitney and David but I think they would say that the sitework/ceiling work estimates were not in the \$830,000 range.

We would not recommend awarding the Tiger Arena project at that price.

Thank you,

Re: Huron Arena Air Conditioning

Dear Mr. Christopherson,

This letter is to serve as confirmation that JLG has reviewed the bid price for the Huron Arena Air Conditioning project. The low bidder was Allied Plumbing & Heating, Inc.

We have reviewed the bid of \$1,720,000 and recommend awarding the project. The bid was higher than anticipated however after reviewing the Allied Plumbing & Heating, Inc. we are comfortable with the bid and feel that a rebid at this point in time will result in even higher bids.

Sincerely,

A handwritten signature in blue ink, appearing to read "C Dekkenga", written in a cursive, flowing style.
